PROFILE

Management consultant with experience in data analysis (SQL) and data visualization (Tableau), KPI development and project management (Jira). Project expertise includes cost reduction, technology implementation and performance improvement. Strong research, communication and problem-solving skills. Track record of successful collaboration with cross-functional teams to deliver critical projects and business transformations.

EXPERIENCE

Management Consultant — Operations Consulting, KPMG, London, 2015–2019

- Reduced Facilities Management spend by 12% through competitive sourcing initiative. Supported 100+ vendors to submit proposals through online portal, reviewed proposals and guided internal and external stakeholders through evaluation process.
- Created insights for vendor evaluation and negotiations by extracting thousands of lines of spend data from IT systems, cleaning data, and developing financial model in Excel.
- Led a team to execute software testing for new global procurement system. Created testing plan; collaborated across functions to identify and plan for interdependencies; executed 100+ tests; presented daily status reports to senior leadership.
- Resolved defects in software configuration by leading cross-functional teams to identify causes and implement fixes.
- Developed new procurement KPIs, including defining calculations and identifying data sources.
- Trained users of new ERP system at offices in UK and India and created reference guides to new system for internal procurement portal.
- Interviewed procurement managers and analyzed spend data to identify multimillion-dollar cost reduction opportunities in IT and Network categories.
